

## Glass wool slab for acoustical and thermal internal insulation of metal air ducts

Lightweight glass wool slab with black glass tissue facing for internal insulation of metal ducts or HVAC equipment, specially indicated when acoustic insulation needs to be provided to the metal duct, in addition to thermal insulation. Can be used also inside ventilation machines or other equipment.

CLIMLINER Slabs are manufactured from inorganic and chemically biosoluble materials and do not include anything that would have effect on corrosion.

### SOUND ABSORPTION

Provides optimum levels of noise reduction throughout the duct, and also a reduction of the noise generated by the air fan.

### THERMAL INSULATION

The glass wool provides thermal insulation and reduces energy losses

### FAST INSTALLATION

Can be installed easily on the inside face of the metal duct

### LIGHTWEIGHT

Lightweight for easy handling

# CLIMLINER SLAB V2
